

Felipe Machado

Data Engineer | Python, Spark, Scala, Airflow, SQL & AWS | Data Pipelines | Cloud & CI/CD

São Paulo, Brazil (Open to Relocation) | [linkedin.com/in/felipemch](https://www.linkedin.com/in/felipemch) | github.com/felipemchdev | felipemch.vercel.app

Professional Summary

Early-career Data Engineer with hands-on experience in production distributed systems. Worked with Python-based data pipelines, Spark and Scala workloads, Airflow orchestration, AWS data infrastructure, and CI/CD. Strong background in production troubleshooting and pipeline reliability within distributed environments. Complementary exposure to data architecture, including risk and cost analysis and scalability trade-offs.

Professional Experience

Data Architecture Intern

Serasa Experian - São Carlos, São Paulo, Brazil

Jul 2025 - Feb 2026 (8 months)

- Conducted risk and cost analysis for data infrastructure initiatives.
- Participated in architectural discussions evaluating system scalability and trade-offs.
- Analyzed new technologies to identify security risks and inefficiencies.
- Supported the definition of data contracts and naming standards.
- Contributed to automation initiatives in large-scale data environments.

Data Engineering Apprentice

Serasa Experian - São Carlos, São Paulo, Brazil

Jan 2024 - Jul 2025 (1 year 7 months)

- Investigated and resolved production incidents in Scala pipelines running in Kubernetes environments.
- Developed and maintained data pipelines using Python, Scala and Spark.
- Monitored and maintained Airflow workflows and Hadoop-based processing environments.
- Managed CI/CD workflows (Jenkins) and executed QA/Dev deployments.
- Performed AWS S3 operations via Bash, including cross-bucket data transfers and Glacier validation.
- Reviewed legacy codebases to understand system architecture and implement bug fixes under production constraints.

Education

Bachelor in Computer Engineering

Centro Universitário Central Paulista — Brazil

Expected Graduation: December 2027

Technical Skills

- **Languages:** Python, Scala, SQL, Bash
- **Data Engineering:** Apache Spark, Apache Airflow, ETL/ELT, Batch Processing
- **Cloud:** AWS (S3, Glacier)
- **Infrastructure:** Kubernetes, Jenkins, CI/CD

Languages

- Portuguese (Native)
- English (C1 - EF SET Certified)
- Spanish (B2)
